

**MEMORANDUM**

---

**Modifications to Summary of Action Tables**

**TO:** CALFED Staff  
Consultant Team

**FROM:** Greg Young

**DATE:** April 12, 1996

The attached copy of the Summary of Action tables has been revised to correct a few mistakes as well as remove the reference to essential elements. The version in the Workshop 6 Information Packet uses the term *essential elements* in a manner that was not entirely consistent with the definition of essential elements and the list of essential elements included elsewhere in the same packet. The attached tables have also been revised in some areas to better distinguish levels of implementation that previously were not discernible (e.g., emergency management plan funding).
